BAMBOO

198 Bamboo forest

Brand new in our bamboo collection:

For our first printed cover in the bamboo collection we found the motif bamboo forest particularly suitable!

And the cover is, like all original Theraline covers, printed in a particularly color-fast reactive printing process.

CLASS IN EVERY PRICE RANGE - THE THERALINE OUTER COVERS

Theraline products from our baby or bed range have also been OEKO-TEX STANDARD 100 certified since July 2021. The stylish, neutral or colourful designs are available in different qualities. Our outer covers are always free of harmful substances, sewn to fit perfectly and no longer shrink.

Fine twill

(approx. 210 g/m² or approx. 170 g/m² - 100 % cotton)

The covers of the original Theraline pillow (approx. 210 g/m²) and the Comfort (approx. 170 g/m²) are made of exceptionally high-quality and soft cotton. Mercerisation and the particularly colour-fast reactive print give a fine sheen. Compare, feel & enjoy for yourself.

Jersey

(approx. 190 g/m² - 100 % cotton)

Alternatively, we also offer a particularly cuddly and soft jersey quality in our collection. All jersey fabrics are dyed using the particularly colour-fast reactive dyeing process.

Organic Jersey

(approx. 190 g/m² - 100 % cotton (organic))

Theraline organic cotton is grown and harvested according to high social standards - without the use of superfluous machinery. In the process, the use of mineral oil-based artificial fertilisers as well as pesticides and herbicides

is completely avoided. Furthermore, the entire production process of the cotton used, including cultivation, spinning, knitting, dyeing and storage, is certified by the Global Organic Textile Standard (GOTS). All CO₂ emissions generated during production are offset compensated by Theraline.

Bamboo

(approx. 190 g/m² - 57 % Viscose from bamboo fibres, 38 % cotton (organic), 5 % elastane)

The high proportion of viscose from bamboo fibres (57 %) and organic cotton (38 %) makes this fabric one of the highest quality and most sustainable in the Theraline collections. Rounded off with 5 % elastane, the fabric feels wonderfully fine and cool.

Muslin

(approx. 19% g/m² - 100 % cotton)

The light and airy muslin fabric is made of 100 % cotton. To immediately feel good and snuggle in. The high-quality 4-layer design, its fine structure and a wonderfully soft touch make it the most valuable fabric in the Theraline collection. – Just try and love it!

Fine knitted fabrics

(approx. 250g/m² 100 % cotton)

The fine knitted pattern in modern colors gives the noticeably high-quality knitted fabric a full soft surface. A discreet style for every season. .

Renforcé

(approx. 145 g/m² - 100 % cotton)

The covers for the less expensive Theraline pillows are produced on pleasant Renforcé cotton using a particularly colour-fast pigment printing process. A light peach finish makes them cuddly soft and easy to care for. Convincing price-performance.

Terry plush & stretch combination

Stretch fabric (90 % nylon, 10 % elastane) & plush (85 % polyester, 15 % polyamide)

As soft and cuddly as micro plush. The special feature: The terry weave makes these micro-fibres even fuller. The terry plush in combination with ultra-flexible stretch fabric is preferred for the plush moon.

TIP:

All our products (with the exception of the plush moon) are washable at 60 °C. Virtually, however, a 40 °C wash is quite sufficient. This saves energy and protects the environment. Therefore, we recommend washing our products only at 40 °C.
